

Empathy Map Overview: Capturing user perspectives across four critical behavioral dimensions—what they **Say**, **Think**, **Do**, and **Feel**—to drive customer-centric product architecture for legal automation.

TARGET USER PERSONA

Legal Document User (Role / User Type)

SAYS

VERBALIZED NEEDS

- “I need a legal document quickly.”
- “I don't know the correct format.”
- “Can I edit the document before downloading?”

THINKS

INTERNAL BELIEFS

- “Will the document contain the required details?”
- “I want a simple and reliable process.”
- “I should review the draft before using it.”

DOES

OBSERVABLE ACTIONS

- Searches for templates online.
- Enters personal / document details into available forms.
- Reviews, edits, and downloads the finalized document.

FEELS

EMOTIONAL DRIVERS

- Confused by intricate legal terminology and archaic phrasing.
- Concerned about making mistakes or submitting invalid drafts.
- Relieved when the drafting process is simple and intuitive.

SYNTHESIS & PRODUCT ALIGNMENT

CUSTOMER NEED Users need an accessible method to provide basic parameters, generate a structured legal draft, inspect/customize it, and export without format headaches.

LEGALEASE SOLUTION Addresses these barriers directly through guided interactive forms, AI-assisted drafting, real-time preview & editing, and instant PDF compilation.
