

Coding & Solution

Date	29 September 2026
Team ID	SWTID-2026-2905
Project Name	LegalEase: AI-Powered Legal Document Generator
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of the implemented LegalEase application and the overall solution. The submission demonstrates working functionality, clean coding practices, and alignment with the defined requirements.

Instructions:

1. Ensure the code is well-structured, commented, and follows best practices for the chosen technology stack.
2. The solution should address the core legal-document generation problem and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to the code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	[Paste your GitHub / GitLab or hosted link here]
Programming Language(s)	Python, JavaScript, HTML, CSS
Framework(s) Used	[Enter the frameworks actually used in the project]
Key Features Implemented	AI-powered legal document generation; user input form; document templates; document preview/download; input validation.
Pending / Incomplete Features	[Mention any pending features, if applicable]
Setup / Run Instructions	Install required dependencies, configure environment variables/API keys if required, then run the application using the project instructions.

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:
