

Project Initialization and Planning Phase

Date	29 September 2026
Team ID	SWTID-2026-2905
Project Title	LegalEase: AI-Powered Legal Document Generator
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

The proposal report aims to transform legal document generation using Generative AI and NLP, boosting efficiency, accuracy and accessibility. It tackles legal service inefficiency and high cost, promising better legal access, reduced risks, and happier customers. Key features include AI-assisted template filling, validation, real-time drafting and secure PDF generation.

Project Overview, Problem Statement, Proposed Solution

Project Overview	
Objective	The primary objective is to revolutionize legal document creation by implementing Generative AI and NLP techniques, ensuring faster, legally
Scope	The project comprehensively assesses and enhances legal documentation process, incorporating AI for automated drafting, validation, review-edit and
Problem Statement	
Description	Addressing inaccuracies, high cost and inefficiencies in current legal documentation system adversely affects operational efficiency.
Impact	Solving these issues will result in improved access to legal services, 90% cost reduction, 80% time saving, reduced legal risks, and overall enhancement in legal compliance, contributing to
Proposed Solution	
Approach	Employing Generative AI (LLMs), NLP and rule-based validation to analyze user inputs, auto-fill verified legal templates, and predict relevant clauses, creating a dynamic and adaptable legal document generator system with human-in-the-loop
Key Features	- AI-assisted document generation from user details - Validation of inputs + legal compliance check - Review & Edit interface before final output - Instant PDF generation & secure storage

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	CPU/GPU specifications, number of cores	T4 GPU / A10G for LLM inference
Memory	RAM specifications	16 GB RAM
Storage	Disk space for data, models, and logs	512 GB SSD + Cloud storage
Software		
Frameworks	Python frameworks	Flask / FastAPI
Libraries	Additional libraries	transformers, langchain, PyMuPDF, spacy
Development Environment	IDE	VS Code, Jupyter, Colab
AI Model	LLM for drafting	GPT-4 / Llama 3 / Mistral + RAG
Data		
Data	Source, size, format	Legal templates (200+), Indian legal dataset, 15 types, PDF/DOCX, JSON
Security & Deployment		
Authentication	User security	JWT, OAuth 2.0, Encryption
Hosting	Cloud platform	AWS / Azure / GCP
